True Wireless Stereo Active Speakers

*No electronics required.
No cables required.
Just you and your smartphone!*

BRITISH DESIGNED SOUND PURITY

British by Design

The uStream One wireless speaker system has been designed by British audio specialist and professional musician, Paul Mitchell who, with the help of his father, built his first hi-fi system as a boy in the early 70's. Paul is passionate about music and remembers the first time he listened to a piece of music in stereo and what it did to him. The space and soundscape conjured up images of the musicians and he felt like he could 'see the music'. That's why in the modern era he has designed a system of such simplicity and ease of use for the lazy times we live in, but made sure it didn't lack any of the refinement of decent hi-fi. You'll, be very glad he did!

Room Filling Sound

The uStream One wireless speaker system features custom designed driver units which allow for a potent, powerful sound that belies the relatively small cabinets they are housed in. While best performance comes when they are used on stands, the uStream One will happily work on a bookshelf or desktop or other AV furniture. We want you to be able to enjoy the kind of sound quality that you'd associate with expensive hi-fi systems without the need for all the electronics and cabling usually required.

Outstanding Value

We think we have created a system that offers amazing performance at a very affordable price. You will find that our careful selection of components coupled with our precision manufacturing and quality control delivers a hi-fi experience that far exceeds expectations at the price. Quality hi-fi does not need to break the bank!

Stereo Hi-Fi Sound via Bluetooth

JUST IMAGINE.....

Music as it was supposed to be heard. With beautiful STEREO separation. And NO WIRES, NO EXTRA GEAR, JUST SPEAKERS!

The uStream series of products are hi-fi quality stereo wireless music systems, featuring two identical bookshelf or stand mount active speakers deploying the latest in True Wireless Bluetooth technology to connect to each other with no connecting cable.

Simply plug into the mains power and switch each unit on. The first unit that is powered on will be the Master and the second unit will become the Slave. Within a few seconds they will connect ready for a Bluetooth playback source to be paired to them as a single device.

Featuring our proprietary designed woofer with metal alloy diaphragm capable of delivering amazing low frequency (bass) sound smoothly and with great control. Coupled with the high frequency (treble) tweeter, the stereo soundscape is comparable to systems sold at much higher prices. A pure joy to listen to and as simple as possible to set up. A hi-fi grade system with no extra electronics or cables to clutter your living space.

Available in durable high-gloss piano black or piano white finish.

Touch Control Panel

Rear Panel

Remote Control Handset

The uStream One system can be controlled from the touch panel on the top of each speaker or via the included aluminium remote control handset.

Any external music source connected to the inputs will produce stereo sound from both speakers, no matter which speaker you decide to connect your device to. You could connect a turntable, MP3 player, TV, set-top TV box etc.

What the experts say...

"I spend hours in a recording studio and I can safely say, at the price point, there is nothing beats the uStream One speakers for pure musical power and convenience. A truly stunning sound from such a small system"

STEVE SIDWELL - Award Winning Producer/Arranger

Grammy, Tony, Emmy award winner

Clients include: Robbie Williams, Michael Buble, Jeff Beck, McFly and many more

"My life has always been music I listen everyday. When I heard the uStream One's for the first time I couldn't believe the power and clarity and from such a simple and neat set up. No wires, no electronics, just the speakers. Highly recommended."

DAVE PEGG - Professional Bass Player

Fairport Convention, Jethro Tull, Richard Thompson & more.

Many instruments played on countless sessions!

"The first time I heard the uStream One speakers I was actually blown away. At the price there really is nothing that sounds this good and in such a convenient package..my wife loves them too!"

JOHN ETCHELLS - Renowned Sound Engineer

Over 200 credits

Artists include: Queen, Dire Straits, David Gilmour, George Harrison & many more

Specifications

Rated Output Power	35W woofer x 2, 15W tweeter x 2 W, 1 kHz, 0.5 % THD (IEC) per unit
Dynamic Power	50 watts per channel
THD (Total Harmonic Distortion)	< 0.5% at 1W 1KHz
Impedance	8 ohms
Frequency Response Range	20Hz – 20KHz
Signal to Noise Ratio	> 70dB
Amplifier	Texas Instruments TPA-3116D2 Class D amp
Bluetooth Chipset	Action Technology Version 5.0 SBC Codec with True Wireless Link
Digital Inputs	OPTICAL x 1 (Rear)
Analog Inputs	RCA x 2, 3.5mm jack x 1, USB x 1
Speaker Drivers	106mm bass driver, 38mm treble driver
Diaphragm	Magnesium Alloy bass driver
Voice Coil	Proprietary design voice coil with 566g neodymium magnet
Dimensions	(W x H x D) 150mm x 237mm x 230 mm
Weight	3.3 kg each speaker
Country of Manufacture	China
Power Supply	AC 110-230V, 50/60 Hz
Accessories	3m AC power cable Remote control handset
